

Keep in control of IT security

Ask any business, small or large—security is one of their biggest concerns. In an increasingly connected world, how can you be sure that your company data is both accessible and secure? A business solution from Microsoft gives you the tools you need to safeguard your business, protect your data, and prepare for the unexpected.

Simplify IT management

The power of the Microsoft Cloud helps you keep business moving forward more securely without added complexity or strain on your resources. Simplify IT management with a single platform to secure your data, connect your team, and manage your business applications.

As a gold competence Microsoft partner, Acora can help you to secure what matters most. Built-in security features and privacy by design allow you to choose the level of security and privacy you need. Microsoft's tools also enable you to reduce your company's risk,

protecting your data with physical and virtual security including access control, encryption, and authentication.

Avoid distractions with always-on protection

The best security occurs in the background, invisible to the user but always on. Acora offers leading protection against spamware and malware so you can focus more on your business and worry less about protecting your data, employees, and customers.

Stay protected in and out of the office

Accessing data on mobile devices is essential for businesses. Enable easy remote access to business applications like ERP and Dynamics 365 for Sales, while keeping your data protected on the device of your choice. Acora offers remote data wipe and powerful encryption features to protect your data wherever work takes you and your team.

Don't let downtime slow you down

Microsoft's products provide trusted reliability that comes with an uptime guarantee, 24/7 support, and fast disaster recovery options. Microsoft builds resiliency and recovery capabilities into its products and technologies, from server to cloud, PCs and devices, to its business applications. So you have the peace of mind that your systems are up and running—and that you are open for business—even if the unexpected happens.

Get prevention right the first time

A business solution from Microsoft gives you the resources you need to plan ahead and prepare for the unexpected. Put the power of the Microsoft Cloud to work for you, while you work to grow your business.
